

Harlequin Cascade™

Now with BioCote® Antimicrobial Protection.

Harlequin Cascade still delights generations of professional dancers, artistic directors and technical and stage managers as the ultimate heavy-duty dance floor. The silky-smooth embossed surface that is often described as giving 'warmth' to a performance, also provides deceptively good grip, as well as a high-quality base for lighting designers.

Harlequin Cascade now comes with BioCote® Antimicrobial Protection, an added ingredient that helps keep the floor hygienically clean, so reducing the risk of cross contamination.

Harlequin Cascade is ideal for ballet, contemporary, modern and theatrical use, as well as aerobics, zumba, hip-hop, jazz, street, salsa, percussive including flamenco, Irish and tap, multi-purpose use, concerts and for operatic performances.

Harlequin Cascade is specified for loose-lay or permanent installation within dance institutions, dance studios, schools and theatres and is an excellent choice as the vinyl dance surface in conjunction with a Harlequin sprung floor.

Permanent or Portable	Both
Roll width	2m
Roll length	10m, 15m, 18m, 20m, 25m
Colours	Black, Pale grey, Dark grey, Hazelnut, White

Harlequin Cascade with BioCote® Antimicrobial Protection.

Harlequin Cascade has been the choice of the world's most prestigious dance and performing arts companies for many years, because dancers know and trust the floor.

But, in these difficult times, it is more important than ever to focus on improving hygiene, so Harlequin have now produced a new, improved Cascade with BioCote® antimicrobial protection.

It is the Harlequin Cascade that you know and love but with an added ingredient with proven antimicrobial properties.

Why do I need antimicrobial protection?

BioCote® antimicrobial technology is manufactured into the new Harlequin Cascade, creating a dance surface upon which microbes, such as bacteria and viruses, cannot survive.

The result is a floor which is easier to keep hygienically clean, reducing the risk of cross contamination by working constantly to reduce the presence of microbes on the surface of the floor.

How does it work?

BioCote® integral antimicrobial protection uses silver ion technology, which is manufactured into new Harlequin Cascade and is proven to offer protection for the expected lifetime of the product. Unlike some antimicrobial protection, it will not wear out or wash off.

This technology reduces microbes on the floor by up to 86% in 15 minutes and up to 99.99% in 24 hours. It works continuously and has been proven effective against a wide range of microbes including the influenza A virus (H1N1) and feline coronavirus (strain Munich).

More about BioCote

With over 20 years' experience, BioCote® are experts in antimicrobial technology and the market leading antimicrobial additives provider. For more information, visit www.biocote.com.

Unprotected surface
On an unprotected surface, the bacteria begin to grow and multiply. Green staining indicates live bacteria.

BioCote® protected surface
On a BioCote® protected surface, the bacteria cannot survive. Red staining indicates that the bacteria have been killed.
